KNOWLEDGE YIELDING RESOURCE OPTIMIZER

THE OPERATING PLATFORM FOR INDEPENDENT SCHOOLS

A hundred moving parts. One platform.

KYRO is a financial-intelligence and operations platform for private and Catholic schools. It connects to the systems you already use — like QuickBooks and your student-information system — then consolidates and transforms that data into board-ready reports, live dashboards, and an AI-powered daily briefing. It doesn't replace your books; it sits on top of them, turning the numbers you already have into finished, decision-ready information for the whole school.

Connect your accounting — a QuickBooks Online sync or a simple trial-balance upload — and KYRO turns it into four board-ready financial statements (Financial Position, Activities, Cash Flows, and Net Assets), plus cash position, budget-vs-actuals, and a polished board packet built to independent-school reporting standards. No controller required.

Tying it all together is **Penny**, an AI chief of staff. Every domain hands its numbers to Penny, who distills them into one morning read — *"Good morning: three things need a decision today."* Instead of chasing eight systems, your leadership team starts the day with a single prioritized briefing.

What KYRO covers

- **Finance**
  Board-ready statements, cash, budget vs actuals, QuickBooks sync
- **Enrollment**
  SIS-synced rosters and enrollment-to-tuition-to-cash projections
- **Accreditation**
  Standards, evidence, and readiness tracked before the visit
- **Advancement**
  Campaigns, gifts, and pledges paced against goal
- **Board reporting**
  Finance-committee packets built to independent-school standards
- **Governance**
  Policies, committees, meetings, minutes, and decisions
- **Facilities**
  Maintenance and capital work with real cost and variance
- **Strategy & HR**
  A self-measuring strategic plan and staffing insight

Why it fits private & Catholic schools

- **Do more with a small office.** Most Catholic-school business offices are one or two people, often part-time. KYRO gives a lean team the reporting muscle of a full finance department — so good stewardship of the school's resources doesn't depend on headcount you don't have.
- **Board-ready, every month.** Trustees and finance committees get clean, consistent, professional statements without your team rebuilding decks by hand.
- **Built for the diocesan structure.** A diocese or school network sees every school individually and consolidated — roll-ups, comparisons, and org-wide financials in one view.
- **Enrollment and cash, connected.** For a tuition-dependent school, KYRO ties enrollment to tuition to cash, so you see the financial consequence of an enrollment shift before it hits the bank.
- **Frees leadership for the mission.** Every hour not spent wrestling spreadsheets is an hour back on the educational and formational mission of the school.

Meet Penny — your AI chief of staff

Penny reads across every domain and hands your team one prioritized morning briefing. Ask her anything in plain English, drop in a document and she files and analyzes it, and get a proactive alert the moment something needs a decision.

How it starts

1. **Connect your books**
   A QuickBooks Online sync or a simple trial-balance upload.
2. **Turn on what you need**
   Start with finance and board reporting; add modules as you grow.
3. **Read your briefing**
   Penny turns every domain into one daily decision list.

TRUSTED WITH SCHOOL DATA

FERPA-compliant • End-to-end encrypted • Two-factor authentication • Hosted on AWS · United States

Start where it hurts most. The platform is modular — begin with finance and board reporting, and turn on enrollment, governance, accreditation, advancement, or facilities as you're ready.
